Avery Dennison® RFID Undermount Reader

www.monarch.com

The power of RFID tagging can impact the entire supply chain from source to destination. RFID implementation ensures integrity and visibility to facilitate immediate product authentication and shipment tracking.

Avery Dennison® RFID Undermount Reader

The inventory accuracy made possible by RFID technology has become a necessity. RFID: what was once forward thinking is now a reality in hands free item level auditing.

RFID Undermount Reader:

- Built to be conveniently placed and secured under a (non-metal) table to minimize space.
- With the undermount reader secured below the table, individual items or cartons are placed on top of the table for immediate confirmation of RFID tagging.
- Verifies each individual RFID tagged item.
- Flags items that are missing a tag or are mistagged.

- Confirms that contents inside modest-sized packages are correctly tagged and accounted for.
- Reads are completed in a matter of seconds.
- Designed for station inventory verification station, ideally in the backroom of the store.
- Data from the reader provides the associate immediate verification on the package contents.
- Ideal for package content verification on omni-channel orders fulfilled and shipped from the backroom of the store.
- At the warehouse level, the undermount provides the ability to pull the individual boxes off shelves to do a quick inventory check.

Benefits:

- Labor Savings - Reduces labor costs associated with errors due to untagged or mistagged RFID items.
- Error Reduction - Verification of every outbound item eliminates shipping errors and related chargebacks.
- Productivity gain.
- Improved inventory accuracy, visibility and loss prevention.

Specifications

Dimensions

Antenna (read area): 11"x11"

Physical Dimension: 13.5"x13.5"

Height: 2.75"

Power:

AC powered - 120-240 volt; 60 watt max power supply, or power over ethernet (POE)
50-60 hertz; 1.2 amp max

output: 24 volts DC
